

ATTENTION ACCESS CONTRATORS

Are you surprised contractors affected by the ACCESS contract haven't banded together to help rectify the damage done to themselves and the American taxpayer? The few of us that make up the ACCESS Action Group are surprised too. Truth is the situation we see ourselves in now is because AFLCMC refuses to fulfill its responsibility under the law. This drives us to seek involvement in an employee based labor organization designed to represent our concerns when the government proposes, designs and awards Professional and Service Contracts. Trade associations such as those that support Brick Layers and Pipe Fitters provide a model of representation that ensures both appropriate compensation and a quality workforce. We can learn and tailor this model in positive step forward for ourselves and the taxpayer.

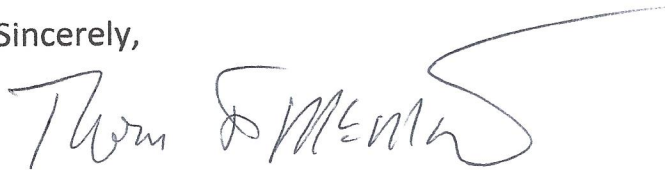

IS THIS YOU?

1. Frustrated with the way the government and the corporations dictated your lower salary and benefits, even though you are doing the same job as before.
2. You desire to grow professionally through DAU, AFIT & Industry training and certification programs.
3. You want employee representation at industry days and input into the Request for Proposals that affect your work environment.

Then get involved and join others that want the same.

Contact the ACCESS Action group by email aag@tfmsview.com or phone 937 985-6275.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom McMasters", with a long, sweeping horizontal line extending to the right.
